

118TH CONGRESS  
1ST SESSION

# S. 2645

To reduce the health risks of heat by establishing the National Integrated Heat Health Information System within the National Oceanic and Atmospheric Administration and the National Integrated Heat Health Information System Interagency Committee to improve extreme heat preparedness, planning, and response, requiring a study, and establishing financial assistance programs to address heat effects, and for other purposes.

---

## IN THE SENATE OF THE UNITED STATES

JULY 27, 2023

Mr. MARKEY (for himself, Mr. PADILLA, Ms. SINEMA, Mr. WYDEN, Mr. BLUMENTHAL, Mr. SANDERS, and Mrs. FEINSTEIN) introduced the following bill; which was read twice and referred to the Committee on Commerce, Science, and Transportation

---

## A BILL

To reduce the health risks of heat by establishing the National Integrated Heat Health Information System within the National Oceanic and Atmospheric Administration and the National Integrated Heat Health Information System Interagency Committee to improve extreme heat preparedness, planning, and response, requiring a study, and establishing financial assistance programs to address heat effects, and for other purposes.

1       *Be it enacted by the Senate and House of Representa-*  
2       *tives of the United States of America in Congress assembled,*

1 **SECTION 1. SHORT TITLE.**

2 This Act may be cited as the “Preventing Health  
3 Emergencies And Temperature-related Illness and Deaths  
4 Act of 2023” or the “Preventing HEAT Illness and  
5 Deaths Act of 2023”.

6 **SEC. 2. DEFINITIONS.**

7 In this Act:

8 (1) COMMUNITY WITH ENVIRONMENTAL JUS-  
9 TICE CONCERNS.—The term “community with envi-  
10 ronmental justice concerns” means a community  
11 with significant representation of communities of  
12 color, low-income communities, or Tribal and indige-  
13 nous communities, that experiences, or is at risk of  
14 experiencing, higher or more adverse human health  
15 or environmental effects, as compared to other com-  
16 munities.

17 (2) EXTREME HEAT.—The term “extreme  
18 heat” means heat that substantially exceeds local cli-  
19 matological norms in terms of any combination of  
20 the following:

- 21 (A) Duration.  
22 (B) Intensity.  
23 (C) Season length.  
24 (D) Frequency.

25 (3) HEAT.—The term “heat” means any com-  
26 bination of the atmospheric parameters associated

1       with modulating human thermal regulation, such as  
2       air temperature, humidity, solar exposure, and wind  
3       speed.

4             (4) HEAT EVENT.—The term “heat event”  
5       means an occurrence of increased heat that may  
6       have heat-health implications.

7             (5) HEAT-HEALTH.—The term “heat-health”  
8       means health effects to humans from heat, during or  
9       outside of heat events, including from vulnerability  
10      and exposure, or the risk of such effects.

11            (6) PLANNING.—The term “planning” means  
12       activities performed across timescales (including  
13       days, weeks, months, years, and decades) with sce-  
14       nario-based, probabilistic or deterministic informa-  
15       tion to identify and take actions to proactively miti-  
16       gate heat-health risks from increased frequency, du-  
17       ration, and intensity of heat waves and increased  
18       ambient temperature.

19           (7) PREPAREDNESS.—The term “preparedness”  
20       means activities performed across timescales (includ-  
21       ing days, weeks, months, years, and decades) with  
22       probabilistic or deterministic information to manage  
23       risk in advance of a heat event and increased ambi-  
24       ent temperature.

10                             (9) URBAN HEAT ISLAND.—The term “urban  
11                             heat island” means the phenomenon observed in ur-  
12                             banized areas in which heat is more extreme than in  
13                             the surrounding exurban areas and heat is hetero-  
14                             geneously distributed within urbanized areas, due to  
15                             factors including—

- 16 (A) low albedo and impervious surfaces;  
17 (B) low vegetation coverage; and  
18 (C) waste heat produced in urban areas.

## 19 SEC. 3. FINDINGS.

20 Congress makes the following findings:

21                   (1) Extreme heat events have been the leading  
22 cause of weather-related death in the United States  
23 over the last 30 years, according to the Centers for  
24 Disease Control and Prevention and the National  
25 Weather Service.

1                             (2) The fourth National Climate Assessment,  
2 mandated by the Global Change Research Act of  
3 1990 (15 U.S.C. 2921 et seq.), finds that during the  
4 next few decades, annual average temperature over  
5 the contiguous United States is projected to increase  
6 by a further 2.2°F relative to current temperatures,  
7 regardless of future scenarios. The National Climate  
8 Assessment projects that the frequency and intensity  
9 of extreme heat events will increase in the future as  
10 global temperature increases.

11                             (3) Exposure to extreme heat can cause acute  
12 heat-related illnesses, such as heat stroke, which al-  
13 ready result in more than 65,000 emergency room  
14 visits each year and exacerbate respiratory and car-  
15 diovascular illnesses.

16                             (4) Heat poses the greatest health risks for  
17 adults older than 65 years of age, pregnant people,  
18 young children, low-income communities, urban com-  
19 munities, communities with low air conditioning  
20 prevalence, socially isolated individuals, people with  
21 mental or physical disabilities, people with under-  
22 lying medical conditions, agricultural or other out-  
23 door workers, workers without sufficient access to  
24 cooling, athletes, incarcerated individuals, people ex-  
25periencing homelessness, and military personnel.

1                         (5) Extreme heat is significantly associated  
2 with serious adverse pregnancy outcomes across the  
3 United States. Those adverse pregnancy outcomes  
4 disproportionately impact Black mothers.

5                         (6) Heat exposure is an issue of environmental  
6 justice, as people living in low-income communities,  
7 communities of color, and Tribal nations face a  
8 number of interacting factors that render them more  
9 vulnerable to extreme heat.

10                        (7) The impacts of heat on human health are  
11 more severe in urban areas where land surface prop-  
12 erties create an urban heat island, particularly in  
13 neighborhoods with limited availability of or access  
14 to green spaces, shade, and tree cover, due to higher  
15 density of building structures and more vehicular  
16 traffic.

17                        (8) Limited availability of tree cover and higher  
18 temperatures are correlated with low-income neigh-  
19 borhoods in urban areas. In Richmond, Virginia,  
20 Baltimore, Maryland, and Washington, DC, re-  
21 searchers found that risk of exposure to extreme  
22 heat is disproportionately distributed to communities  
23 of color in patterns associated with segregation and  
24 redlining.

1                             (9) Researchers have found that few communities  
2                             in the United States have sufficient climate  
3                             and health information, guidance, and resources for  
4                             heat planning, preparedness, and response.

5                             (10) The risks associated with extreme heat  
6                             have complex interactions and impacts, and the  
7                             management of those risks requires a  
8                             transdisciplinary approach.

9                             (11) Regions, communities, and populations  
10                             that face the greatest health consequences of ex-  
11                             treme heat often may experience the lowest heat risk  
12                             perceptions, have limited incentives, or have access  
13                             to the fewest resources for responding to extreme  
14                             heat, and as such, may be less likely to take pre-  
15                             cautions.

16                             (12) Research on the impacts of extreme heat  
17                             on human health and the effectiveness of solutions  
18                             under varying climate, social, and other contexts is  
19                             stymied by a lack of access to reliable, timely health  
20                             observations and surveillance due to proprietary data  
21                             rights, expense, privacy and security concerns, incon-  
22                             sistent reporting of health outcomes and contribu-  
23                             tory factors, poor data integration and interoper-  
24                             ability, few incentives and little systematic coordina-  
25                             tion to address those problems, and a lack of ade-

1 quate climate observation, modeling, and assessment  
2 in rural, urban, indoor, and occupational settings.

3 (13) Integrated climate and health research and  
4 information, when developed in a collaborative,  
5 transdisciplinary manner, can inform long- and me-  
6 dium-range scenario-based planning and decision  
7 making to protect vulnerable communities and popu-  
8 lations from extreme heat, reduce exposure to ex-  
9 treme heat, and address factors that increase vuln-  
10 erability.

11 (14) Increased heat can have cascading and  
12 compounding impacts across and among sectors in-  
13 cluding energy, food supply and quality, transpor-  
14 tation, housing, infrastructure, hospital and  
15 healthcare delivery, and education, all of which af-  
16 fect health and well-being.

17 (15) Heat action plans and early warning sys-  
18 tems can reduce heat-related morbidity and mor-  
19 tality by clearly identifying roles and responsibilities  
20 as well as evidence-based actions and thresholds to  
21 enhance preparedness, and by promoting behavior  
22 changes and actions taken by local governments,  
23 communities, and individuals through awareness and  
24 increased risk perception among those most vulner-  
25 able to the health impacts of heat.

1 SEC. 4. NATIONAL INTEGRATED HEAT HEALTH INFORMATION SYSTEM INTERAGENCY COMMITTEE.

3       (a) ESTABLISHMENT OF COMMITTEE.—There is es-  
4 tablished within the Office of Science and Technology Pol-  
5 icy an interagency committee, to be known as the “Na-  
6 tional Integrated Heat Health Information System Inter-  
7 agency Committee” (in this section referred to as the  
8 “Committee”).

9       (b) PURPOSE.—The Committee shall coordinate,  
10 plan, and direct agencies represented on the Committee  
11 to execute, as appropriate, activities across such agencies  
12 to ensure a united Federal approach to reducing health  
13 risks from heat across timescales (including days, weeks,  
14 months, years, and decades).

**15 (c) MEMBERSHIP.—**

16                   (1) IN GENERAL.—In order to carry out and  
17       achieve the purpose described in subsection (b), the  
18       Committee shall include the following:

(B) Not fewer than 1 representative from each of the following:

(I) From the National Oceanic and Atmospheric Administration, the following:

(aa) The National Weather Service.

(bb) The Office of Oceanic and Atmospheric Research.

(cc) The National Environmental Satellite, Data, and Information Service.

(II) The National Institute of Standards and Technology.

### (III) The Bureau of the Census.

(ii) From the Department of Health Human Services, the following:

(I) The Centers for Disease Control and Prevention, including the National Institute for Occupational Safety and Health.

(II) The Office of the Assistant Secretary of Health and Human Services for Preparedness and Response.

### (III) The Substance Abuse and Mental Health Services Administration.

### 3 (V) The Indian Health Service.

6 (I) The Bureau of Indian Affairs.

(II) The Bureau of Land Management.

### 9 (III) The National Park Service.

10 (iv) From the Environmental Protec-  
11 tion Agency, the following:

12 (I) The Office of Environmental  
13 Justice.

14 (II) The Office of Air and Radi-  
15 ation, if the Administrator of the En-  
16 vironmental Protection Agency deter-  
17 mines appropriate.

21 (IV) The Office of International  
22 and Tribal Affairs.

25 (vi) The Department of Defense.

(x) The Department of Energy.

10 (xii) The Department of Veteran Af-  
11 fairs

24 (3) CO-CHAIRS.—

14 (ii) SUBSEQUENT SELECTION.—Sub-  
15 sequent co-chairs shall be selected from  
16 among the members of the Committee.

6       (d) RESPONSIBILITIES OF COMMITTEE.—The Com-  
7 mittee shall promote an integrated, Federal Government-  
8 wide approach to reducing health risks and impacts of  
9 heat, including by—

17 (e) STRATEGIC PLAN.—

1                             (A) a strategy for improving and coordi-  
2                             nating existing Federal data collection and data  
3                             management to include sharing of data and sta-  
4                             tistics on heat-related illnesses and mortalities  
5                             and other impacts to inform heat-related activi-  
6                             ties;

7                             (B) a strategy for improving and coordi-  
8                             nating Federal activities to understand user  
9                             gaps and needs, conduct research, foster innova-  
10                            tive solutions, and provide actionable infor-  
11                            mation and services; and

12                            (C) mechanisms for financing heat pre-  
13                             paredness within such agencies as the Com-  
14                             mittee considers appropriate.

15                           (2) IMPLEMENTATION PLANS.—The head of an  
16                             agency represented on the Committee may imple-  
17                             ment the portions of the strategic plan required by  
18                             paragraph (1) that are relevant to that agency by  
19                             developing and implementing a multi-year implemen-  
20                             tation plan.

21                           (3) UPDATES.—Not later than 5 years after the  
22                             submission of the strategic plan required by para-  
23                             graph (1), and every 5 years thereafter, the Com-  
24                             mittee shall submit to Congress an update of the

1 plan, which shall include progress made toward goals  
2 outlined in the plan and new priorities that emerge.

3 (f) ADMINISTRATIVE SUPPORT.—The Administrator  
4 of the National Oceanic and Atmospheric Administration  
5 shall provide technical and administrative support to the  
6 Committee, using amounts authorized to be appropriated  
7 to the Administration.

8 (g) CONSULTATION.—In carrying out the responsibil-  
9 ities of the Committee, the Committee shall consult with  
10 relevant regional, State, Tribal, and local governments,  
11 international organizations and partners, research institu-  
12 tions, nongovernmental organizations and associations,  
13 and medical experts with expertise in emergency response,  
14 environmental health, economic or business development,  
15 or community engagement.

16 **SEC. 5. NATIONAL INTEGRATED HEAT HEALTH INFORMA-**  
17 **TION SYSTEM.**

18 (a) ESTABLISHMENT.—The Under Secretary of Com-  
19 merce for Oceans and Atmosphere shall establish within  
20 the National Oceanic and Atmospheric Administration a  
21 system, to be known as the “National Integrated Heat  
22 Health Information System” (NIHHIS) (in this section  
23 referred to as the “System”).

24 (b) PURPOSE.—The purpose of the System is to im-  
25 prove the capacity of weather, subseasonal, and seasonal

1 forecasts for the United States to allow the Federal Gov-  
2 ernment and stakeholders to plan, prepare for, adapt to,  
3 and mitigate health risks of extreme heat across multiple  
4 timescales.

5 (c) DIRECTOR.—The System shall be headed by a Di-  
6 rector.

7 (d) RESPONSIBILITIES.—In carrying out the purpose  
8 described in subsection (b), the Director shall—

9 (1) develop and sustain robust relationships  
10 with Federal and non-Federal partners and decision-  
11 makers—

12 (A) to respond to the demand for action-  
13 able weather- and climate-related information  
14 that reduces health risks on multiple timescales;

15 (B) to conduct research and scientific in-  
16 novation; and

17 (C) to develop and deliver timely and ac-  
18 cessible decision support services, solutions,  
19 tools, and information to inform planning, pre-  
20 paredness, and risk-reducing actions across  
21 timescales;

22 (2) coordinate and collaborate with the inter-  
23 national community and global partners to conduct  
24 research and learn from, leverage, and contribute to

1 global knowledge as it pertains to predicting and  
2 preventing the impacts of increased heat;

3 (3) enhance observations, surveillance, monitoring, and analysis necessary for the activities de-  
4 scribed in paragraphs (1) and (2); and

5 (4) communicate, educate, and build awareness  
6 regarding the risks and impacts of increased heat  
7 and extreme heat events to communities, educational  
8 and economic sectors, Tribal governments, and other  
9 relevant stakeholders.

10 (e) DATA MANAGEMENT.—

11 (1) AVAILABILITY.—The Director shall coordi-  
12 nate with interagency partners to ensure that data  
13 and metadata associated with the System is fully  
14 and openly available, within the legal right to redis-  
15 tribute, in accordance with chapter 31 of title 44,  
16 United States Code (commonly known as the “Fed-  
17 eral Records Act of 1950”), and the Federal Evi-  
18 dence-Based Policymaking Act of 2018 (Public Law  
19 115–435; 132 Stat. 5529) and the amendments made  
20 by that Act, to maximize use of such data to support  
21 the goals of the System.

22 (2) NATIONAL CENTERS FOR ENVIRONMENTAL  
23 INFORMATION.—The Under Secretary of Commerce  
24 for Oceans and Atmosphere shall manage, maintain,

1 and steward archival data and metadata associated  
2 with the System within the National Centers for En-  
3 vironmental Information.

4 (f) RESEARCH PROGRAM.—The Director shall de-  
5 velop and implement a climate and health research grant  
6 program, in coordination with the financial assistance pro-  
7 gram under section 7 and other Federal programs—

8 (1) to improve understanding of—

9 (A) the climate epidemiology and social,  
10 behavioral, and economic drivers of heat-health  
11 vulnerability and risk;

12 (B) the drivers of climate variability, pre-  
13 dictability, and changes in extreme heat; and

14 (C) the impacts of extreme heat, compound  
15 hazards, and cascading impacts across  
16 timescales;

17 (2) to investigate and evaluate the effectiveness  
18 of risk management actions, interventions, policies,  
19 standards, codes, and guidelines; and

20 (3) to address other topics as appropriate, in-  
21 cluding topics outlined in the strategic plan required  
22 by section 4(e)(1) and the financial assistance pro-  
23 gram under section 7.

1       (g) ADDITIONAL ACTIVITIES.—The Director shall  
2 carry out such other activities as the Committee considers  
3 appropriate.

#### 4 SEC. 6. STUDY ON EXTREME HEAT INFORMATION AND RE-

## 5 SPONSE.

## 6 (a) STUDY.—

(1) IN GENERAL.—Not later than 120 days after the date of the enactment of this Act, the Under Secretary of Commerce for Oceans and Atmosphere, in consultation with the National Integrated Heat Health Information System Interagency Committee and the individuals and entities described in section 4(g), shall seek to enter into an agreement with the National Academies of Sciences, Engineering, and Medicine to conduct a study on extreme heat information and response, to be completed not later than 3 years after such date of enactment.

(2) ELEMENTS.—The study described in paragraph (1) shall—

20 (A) identify policy and research gaps,  
21 which may include—

22 (i) regions of the United States with  
23 the largest gaps between awareness, pre-  
24 paredness, and capacity to address extreme  
25 heat; and

(ii) heat-related gaps in data, such as—

(I) the number of schools, prisons, and other public facilities that lack air conditioning;

6 (II) the demographic breakdown  
7 of people affected by heat events, in-  
8 cluding by race, age, gender, occupa-  
9 tion, and income;

10 (III) medical coding in health  
11 care facilities (such as hospitals,  
12 emergency rooms, and health centers)  
13 that indicate heat-related illnesses  
14 (such as kidney failure, dehydration,  
15 and fainting spells); and

16 (IV) with respect to public policy  
17 at the State and community level that  
18 enhance vulnerabilities to extreme  
19 heat (such as outdoor working condi-  
20 tions and thresholds to protect work-  
21 ers, animals, and others susceptible to  
22 heat-related illness);

23 (B) provide recommendations for address-  
24 ing gaps with respect to policy, research, oper-  
25 ations, communications, and data, including the

1           gaps identified under subparagraph (A), affecting  
2           heat-health planning, preparedness, response,  
3           resilience, adaptation, and environmental  
4           justice and equity;

5           (C) provide such other recommendations as  
6           the Director considers appropriate, which may  
7           include strategies for—

8                  (i) communicating warnings to and  
9                  providing impact-based decision support to  
10                 promote preparedness actions and resilience  
11                 of populations vulnerable to extreme  
12                 heat;

13                  (ii) understanding compound and cascading  
14                 risks, and implementing alternative  
15                 heat-health risk reduction interventions to  
16                 manage those risks collectively, such as reducing  
17                 risk of the transmission of infectious diseases  
18                 during heat waves by creating outdoor cooling  
19                 locations or increasing ventilation and filtration  
20                 in indoor cooling centers;

21                  (iii) promoting community resilience  
22                 to heat events and incorporating principles  
23                 of environmental justice in community response  
24                 to heat waves;

(iv) addressing the impacts of extreme

heat on energy cost, affordability, and reli-

ability for residential and commercial in-

4 infrastructure (such as weatherization, en-

5 energy costs, electric power systems, and

water supply and treatment systems); and

7 (v) establishing labor and other stand-

8 ards for workers and heat; and

9 (D) consider such other subjects as the

Committee considers appropriate, which may in-

11 clude—

(i) the feasibility of enhancing and

13 standardizing existing nationwide data col-

14 lection on heat-related illnesses and mor-

15 talities to improve and ensure consistent

## 16 collection of national-level heat illness data

17 across all 50 States, territories, and local

18 jurisdictions of the United States;

19 (ii) mechanisms for financing heat

20 preparedness; and

21 (iii) the effectiveness of county- or

22 local-level heat awareness and communica-

tion approaches, heat action, and tools,

24 preparedness plans, or mitigation.

8           (b) REPORT.—Not later than 90 days after com-  
9 pleting the study described in subsection (a)(1), the Com-  
10 mittee shall—

15 (2) submit the report to—

20 (C) the Committee on Science, Space, and  
21 Technology of the House of Representatives:

## 1 SEC. 7. FINANCIAL ASSISTANCE FOR RESILIENCE IN AD-

## 2 DRESSING EXTREME HEAT AND HEALTH

## 3 RISKS.

## 4 (a) IN GENERAL.—

5 (1) ESTABLISHMENT.—Not later than 1 year  
6 after the date of the enactment of this Act, the Di-  
7 rector of the National Integrated Heat Health Infor-  
8 mation System may, in coordination with the Na-  
9 tional Integrated Heat Health Information System  
10 Interagency Committee, establish and administer a  
11 community heat resilience program to provide finan-  
12 cial assistance to eligible entities to carry out  
13 projects described in subsection (e) to ameliorate  
14 human health impacts of extreme heat events.

15 (2) REVISION.—Upon completion of the stra-  
16 tegic plan required by section 4(e)(1), the Com-  
17 mittee may revise the community heat resilience pro-  
18 gram to ensure the program aligns with the strategic  
19 plan and is administered in accordance with the  
20 plan.

21 (b) PURPOSE.—The purpose of the financial assist-  
22 ance provided under this section is to improve community  
23 resilience to heat and heat-health impacts and further sci-  
24 entific research to address adaptation gaps and priorities.

1       (c) FORMS OF ASSISTANCE.—Financial assistance  
2 provided under this section may be in the form of prizes,  
3 contracts, grants, or cooperative agreements.

4       (d) ELIGIBLE ENTITIES.—Entities eligible to receive  
5 financial assistance under this section to carry out  
6 projects described in subsection (e) include—

- 7               (1) nonprofit entities;
- 8               (2) States;
- 9               (3) Tribal governments;
- 10              (4) local governments;
- 11              (5) local workforce development boards; and
- 12              (6) academic institutions.

13       (e) ELIGIBLE PROJECTS.—Projects described in this  
14 subsection include the following:

- 15              (1) Projects to reduce heat-health risks, includ-  
16 ing sustainable heat reduction and mitigation solu-  
17 tions such as for cool roofs, cool pavements, urban  
18 forestry or tree plantings and maintenance, the pro-  
19 vision of shade, cooling and resilience centers, retro-  
20 fitting buildings for cooling, improving the resilience  
21 of the power grid to ensure reliable air conditioning,  
22 energy efficiency, acquisitions or upgrades of filtra-  
23 tion systems or high-efficiency air conditioning sys-  
24 tems, and strategies to improve community level re-  
25 sponse before and during a heat event.

- 1                         (2) Training programs to support the development and integration of education and training programs for identifying and addressing risks associated with climate change for vulnerable individuals.
- 5                         (3) Projects focusing on being responsive to heat-related needs from communities heard from engagements at different geographic scales (national to regional to local) including—
- 9                             (A) to expand public awareness of heat risks;
- 11                             (B) to conduct community-based climate and health observational campaigns;
- 13                             (C) to conduct scientific research to assess gaps and priorities regarding the risks of extreme heat in communities;
- 16                             (D) to communicate risks and warnings to isolated communities;
- 18                             (E) to support the establishment of workplace policies and practices to reduce the risk of extreme heat illness among workers;
- 21                             (F) to educate such communities about how to respond to extreme heat events; and
- 23                             (G) to establish local, city, and county heat planning and heat-related emergency action plans.

1                   (4) Other projects that the Director determines  
2                   will achieve a significant reduction in heat exposure  
3                   or increased resilience to increased heat or extreme  
4                   heat events.

5                   (f) PRIORITIES.—In selecting eligible entities to re-  
6                   ceive financial assistance under this section, the Director  
7                   shall prioritize entities that will carry out projects that  
8                   provide benefits for historically disadvantaged commu-  
9                   nities and communities with significant heat disparities  
10                  associated with race, ethnicity, or income.

11                  (g) DISTRIBUTION OF ASSISTANCE.—

12                  (1) COMMUNITIES WITH ENVIRONMENTAL JUS-  
13                  TICE CONCERN AND LOW INCOME COMMUNITIES.—  
14                  Not less than 40 percent of the amount of financial  
15                  assistance provided under this section in any fiscal  
16                  year shall be provided to eligible entities to imple-  
17                  ment projects described in subsection (e) in commu-  
18                  nities with environmental justice concerns or low-in-  
19                  come communities.

20                  (2) EQUITABLE DISTRIBUTION.—The Director  
21                  shall seek to equitably distribute financial assistance  
22                  provided under this section based on geographic lo-  
23                  cation or such other factors as the Director deter-  
24                  mines appropriate.

1     **SEC. 8. AUTHORIZATION OF APPROPRIATIONS.**

2         (a) NATIONAL INTEGRATED HEAT HEALTH INFOR-  
3         MATION SYSTEM INTERAGENCY COMMITTEE; NATIONAL  
4         INTEGRATED HEAT HEALTH INFORMATION SYSTEM.—  
5         There is authorized to be appropriated to the National  
6         Oceanic and Atmospheric Administration to carry out sec-  
7         tions 4 and 5, including for any administrative costs for  
8         the National Integrated Heat Health Information System  
9         Interagency Committee and the National Integrated Heat  
10      Health Information System, the following:

- 11             (1) For fiscal year 2024, \$20,000,000.  
12             (2) For fiscal year 2025, \$20,000,000.  
13             (3) For fiscal year 2026, \$20,000,000.  
14             (4) For fiscal year 2027, \$20,000,000.  
15             (5) For fiscal year 2028, \$20,000,000.

16         (b) STUDY ON EXTREME HEAT INFORMATION AND  
17         RESPONSE.—There is authorized to be appropriated to  
18         the National Oceanic and Atmospheric Administration to  
19         contract with the National Academies of Sciences, Engi-  
20         neering, and Medicine to carry out section 6 \$500,000 for  
21         each of fiscal years 2024 through 2026.

22         (c) FINANCIAL ASSISTANCE FOR RESILIENCE IN AD-  
23         DRESSING EXTREME HEAT AND HEALTH RISKS.—There  
24         is authorized to be appropriated to the National Oceanic  
25         and Atmospheric Administration to carry out section 7 the  
26         following:

- 1       (1) For fiscal year 2024, \$10,000,000.
- 2       (2) For fiscal year 2025, \$10,000,000.
- 3       (3) For fiscal year 2026, \$20,000,000.
- 4       (4) For fiscal year 2027, \$30,000,000.
- 5       (5) For fiscal year 2028, \$30,000,000.
