

117TH CONGRESS
2D SESSION

S. 5034

To authorize additional appropriations to increase the production of munitions and ammunition to deter Russian and Chinese aggression, and for other purposes.

IN THE SENATE OF THE UNITED STATES

SEPTEMBER 29, 2022

Mr. COTTON (for himself, Mrs. FISCHER, Mr. SCOTT of Florida, and Mr. ROUNDS) introduced the following bill; which was read twice and referred to the Committee on Armed Services

A BILL

To authorize additional appropriations to increase the production of munitions and ammunition to deter Russian and Chinese aggression, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. FINDINGS.**

4 Congress makes the following findings:

5 (1) Russia has engaged in an unprovoked war
6 of aggression against the sovereign nation of
7 Ukraine since February 2022.

8 (2) The United States and its allies have sought
9 to provide the Ukrainian people with the weapons

1 and equipment they desperately need to reverse
2 Vladimir Putin's illicit campaign.

3 (3) The United States and North Atlantic
4 Treaty Organization (NATO) allies have been slow
5 to replenish their arsenals of artillery systems, am-
6 munition, and missiles that have been depleted as a
7 result of the provision of weapons and equipment to
8 Ukraine.

9 (4) Much of the industrial capacity of the
10 United States and Europe to produce munitions has
11 atrophied since the end of the Cold War.

12 (5) Deputy Secretary of Defense Kathleen
13 Hicks has noted "obsolescence issues" in certain
14 munitions lines since the start of Russian hostilities
15 in Ukraine.

16 (6) While Russia has waged its unjustified war
17 in Europe, China has obvious and blatant military
18 aspirations to dominate the Indo-Pacific region and
19 undermine the rules-based global international order.

20 (7) The industrial base of the United States
21 has languished from underfunding of procurement of
22 necessary equipment at scale for decades.

23 (8) Should more conflict erupt, the United
24 States and its allies do not currently maintain the
25 necessary stockpiles to execute sustained operations.

1 (9) Neither the United States nor its allies
2 maintain the capability to rapidly reconstitute their
3 arsenals due to the complex manufacturing processes
4 necessary for the construction and assembly of mod-
5 ern weaponry.

6 (10) The United States must immediately and
7 dramatically step up the procurement of military
8 munitions and expand the defense industrial base to
9 meet these increased requirements to ensure that the
10 interests of the United States are protected in Eu-
11 rope and the Indo-Pacific.
